

Your health and safety is our priority

What we're doing to keep you safe

We provide essential health services and have enough PPE to ensure your safety. We screen all employees, physicians, and patients each day as they enter our centers. By implementing social distancing, disinfecting and cleaning all surfaces after each patient is seen, we are confident that we can serve you in a safe and efficient manner.

Following

Following government protocols and recommendations.

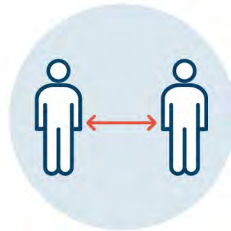

PPE

Personal protective equipment provided for patients and staff

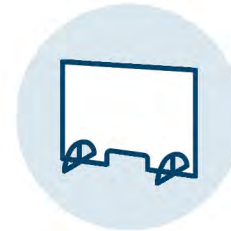

Cleaning

Examination room & mammography system deep cleaned after every exam

Distancing

Reduced patient volume, guaranteeing no contact with another patient from reception to departure

Barriers

Temporary glass partitions installed between patient and staff

Screening

Temperature check of all employees & patients. Canceling of appointment if positive to any screening question

Additional precautions on Mobile Coaches

1. All motorcoaches are equipped with exhaust vents specifically designed for infection control and exchange cabin air every 3-5 minutes.
2. All three fans will be turned on when more than one occupant is on board.
3. All motorcoaches are equipped with anti-microbial medical grade surfaces and hospital grade high-performance HEPA filter media A/C filters.
